

Manas Bhargavan

Santa Barbara, CA | (408) 394-3426 | manas@ucsb.edu | [linkedin.com/in/manasija-bhargavan](https://www.linkedin.com/in/manasija-bhargavan)

EDUCATION

University of California, Santa Barbara (UCSB) Expected Graduation: June 2028 **Bachelor of Science (B.S.), Computer Engineering**

- Cumulative GPA: 3.98
- **Relevant Coursework:** Object-Oriented Programming in C++, Problem Solving in C++ 1/2, Data Structures and Algorithms, Foundational Circuits and Systems, Digital Design Principles (Spring Quarter: Artificial Intelligence, Computer Communication Networks, Machine Learning).

SKILLS

- Computer: Python, C/C++, Embedded C, React, SystemVerilog, Supabase, AWS, Git, Linux, Pandas, GNUPlot
- Hardware: STM Microcontrollers, Optoelectronics, Oscilloscopes, ModelSim, Quartus II, LTSpice, Logisim
- Language: Formal Education in Spanish, Tamil, and Sanskrit, written and oral

RELEVANT EXPERIENCE

Device Design Fellowship Intern, October 2025-Present, **Hikari Medical Technologies** | Santa Barbara, CA

- Designed mixed-signal hardware and embedded C firmware for a medical wearable prototype
- Implemented photodiode-based instrumentation to log optical degradation data across wavelengths.
- Built automated test setups to quantify formulation breakdown under controlled illumination
- Integrated sensing, data acquisition, and analysis workflows for early-stage validation

Internal Vice President and Firmware Engineer, July 2025-Present **Formula SAE (Gaucho Racing)** | UCSB, CA

- Led a 100+ member engineering organization with \$100k+ annual budget
- Secured funding and resources from corporate sponsors, student government, school, and alumni partners
- Organized campus events, outreach initiatives, and structured onboarding for new members
- Designed C-based control logic and communication protocols for the STM32G474RE with Firmware subteam

Office Assistant March 2025-Present **Pardall Center, Associated Students** | Isla Vista, CA

- Connected students with academic, financial, and legal support resources
- Coordinated case intake and resource referrals across multiple service areas
- Developed a Python auto-scheduler to optimize Pardall Center staff shift assignments

Contract Web Developer June 2025-August 2025 **RightTrack Advertising** | Dubai, UAE

- Built a full-stack web application with secure authentication, an admin dashboard, and an interactive incentive system
- Integrated Supabase for database, auth, and backend services
- Developed a responsive React frontend with modern UI components and animations
- Provide ongoing maintenance, feature updates, and technical support

Software Developer June 2022-September 2023 **JN Management LLC** | Dallas, TX

- Automated utility usage monitoring for commercial properties using Python-based infrastructure
- Integrated Dreamcatcher hardware with AWS for data ingestion, processing, and storage
- Created dashboard to visualize aggregated usage metrics and trends
- Eliminated manual tracking through end-to-end data collection and reporting automation

Programmer April 2023-July 2023 **KUV Consultants Security & Disaster Preparedness** | Phoenix, AZ

- Developed a real-time dashboard to calculate backup generator fuel needs across 43 water facilities
- Modeled 72-hour outage scenarios to support emergency operations planning
- Computed fuel consumption and efficiency metrics for rapid decision-making
- Delivered data visualization tools for system-wide situational awareness

Private Tutor March 2022-May 2024 | Los Gatos, CA

- Tutored K-12 students in arithmetic, algebra, and introductory calculus
- Supported reading comprehension and expository writing skill development
- Adapted instruction to diverse learning levels and styles
